Sales Yard on
EUCLID AVENUE
ONTARIO, CAL.

TO CORRESPONDENTS

Order Early

We make it a rule to fill orders in rotation as received. Those who order early will be sure of getting the best stock.

Packing.

We pack all trees in the most careful manner free of charge, either in bales or boxes according to the size of the order and distance to be shipped.

Shipping Instructions.

Please state distinctly how you wish us to ship, by freight or express and by which route. Otherwise we will use our own discretion in forwarding.

Substitution.

In case we cannot fill the order to the letter, state whether substitution will be allowed, and to what extent. Where no instructions in this respect accompany the order we shall feel at liberty to substitute other varieties as nearly similar as possible. To those who are planting a home orchard and are not acquainted with the different varieties, we would suggest that they leave the selection to us, as we would send only such varieties as are acknowledged to give general satisfaction.

Terms.

Our terms are invariably cash or sufficient guarantee that the money will be forwarded on receipt of the goods.

Prices.

Articles mentioned in the following list will be furnished at prices named as follows: Less than five of a variety at single rates; five and under thirty at the ten rate; thirty and under 300 at the 100 rate; 300 or over at the 1000 rate.

Estimates.

We will cheerfully furnish estimates on all lists submitted.

Certificate of Inspection.

All the requirements of the Horticultural Commissioners of the county have been complied with and certificates will be furnished with every shipment.

Guarantee of Genuineness.

Our trees are all budded or grafted from bearing trees. We personally attend to this part of the work and use the utmost care to have them true to name. We fully realize that our future success in the nursery business depends much on the reliability of our labels. We hold ourselves in readiness, on proper proof, to replace any trees that may prove untrue to name, free of charge. It is mutually agreed between the purchaser and ourselves, however, that our guarantee of genuineness, shall in no case make us liable for any sum greater than that originally paid for the goods.

Remarks.

We take pleasure in presenting to our patrons our price list for the coming season.

The stock we have to offer is in first class condition, healthy and vigorous, and we feel certain of our ability to please all kindly favoring us with their orders.

20	109	125
25	69	79
30	48	55
35	35	40
40	27	31

RULE, SQUARE METHOD. Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill; which, divided into the number of feet in an acre (43,560), will give the number of plants to the acre.

RULE, EQUILATERAL TRIANGLE METHOD. Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

PRICE LIST OF

..Armstrong Nurseries..

SEASON OF 1899-1900

FRUIT DEPARTMENT

We make a specialty of growing a high grade of citrus nursery stock. Our stock for this season has been carefully grown and is mostly strong one-year buds. The quotations given include balling and sacking.

EVERGREEN HEDGE PLANTS.

We have grown a large stock of Guadalupe cypress which we highly recommend for hedge, windbreak and avenue planting. As a drouth resister it cannot be equaled by any other evergreen of like character, and will not break down with wind as it roots very deep This with the fine bluish green foliage and graceful appearance combine to make it worthy of extensive planting.

	Each	100	1000
